

Do you or someone you know deal with the following symptoms in your rotator cuff (shoulder): dull or gradually increasing pain, weakness of the shoulder, tenderness/swelling, stiffness and reduced function and mobility?

We are seeking volunteers for a clinical research trial that is studying the safety and effectiveness of an investigational drug injection to treat individuals who are between the ages of 18 and 65 and have been dealing with rotator cuff tendinopathy for 6 weeks to 6 months

Qualified participants will receive at no cost:

- Study medication or placebo**
- Study-related health tests**
- Study-related care from a board certified physician**

**No health insurance or referrals required
Qualified participants may be reimbursed for study-related time and travel
This study has a total of 12 visits**

**Altoona Arthritis & Osteoporosis Center
Altoona Center for Clinical Research**

175 Meadowbrook Lane
Duncansville, PA 16635
